

How to dispose Small Rechargeable Batteries

We ask for your cooperation in proper waste sorting to prevent smoking or igniting due to impact or pressure.

Start Date

April 1, 2026

Collection Day

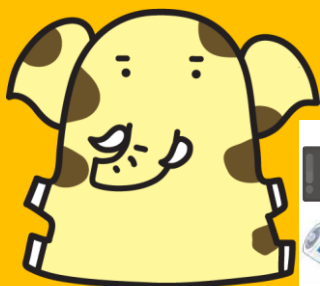

These will be collected as **“Hazardous Waste”** on your scheduled **“Non-burnable Garbage.”**

Target Items

- Small Rechargeable Batteries used at home (lithium-ion batteries, mobile power banks, etc.)
- Devices with built-in batteries (smartphones, handheld fans, electric shavers, etc.)

How to Dispose

Place them into the **“Cans”** or **“Bottles”** basket on your scheduled **“Non-burnable Garbage”** days.

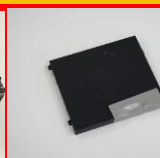

Ideal character of Niiza city
“ZOUKIRIN”

※ DO NOT place them in the **“Used Dry Cell Batteries”** basket.

※ Please make sure batteries are fully discharged and cover exposed terminals with tape for insulation.

※ Items that are swollen, deformed, or damaged cannot be accepted at collection points due to the risk of smoke or fire. Please bring them to the Fujimi Environmental Center.

Examples of Small Rechargeable Batteries

※Look for the recycle marks

• Nickel-Cadmium (Ni-Cd) • Nickel-Metal Hydride (Ni-MH) • Lithium-ion (Li-ion) batteries
(Including mobile batteries and batteries for vacuum cleaners or power tools, etc.)

Examples of devices with Built-in Batteries

Handheld Fans

Electronic Cigarettes (Vapes)

Wireless Earphones

※ Items larger than 18L can (approx 24cm×24cm×35cm) must be disposed of as oversized garbage.

※ Items generated from business activities cannot be collected by the city.
